## INTRODUCTORY

**I**N compiling this catalogue, which shows our complete line at present, the thought foremost in our minds has been to take this opportunity to thank those of you who have favored us with your patronage in the past and to assure you of our appreciation. We have sincerely tried to please you in every transaction, and we hope and believe we have merited a continuance of your favors.

**EXPANSION**—Last year we expended \$150,000.00 for additional buildings and equipment to enable us to better serve you and to increase our line. We now make a more varied and complete line of cold chisels, cape chisels, round nose cape chisels, diamond point chisels, round point solid punches, pin punches and lining up punches, than any other manufacturer in the entire world, and in addition thereto, the best line.

**NEW ITEMS**—We have added star drills in all sizes and lengths, breast drills, hoof nippers, hoof parers, shoeing pincers, lining up punches, wrenches, pliers, oil cans, files, expansive bits, auger bits of all kinds, wood chisels, draw knives, cleavers, butcher steels, pocket knives, and snips.

**ITEMS OF SPECIAL INTEREST**—Every item in our punch and chisel line is very popular. The next time you order chisels and punches, we suggest that you go over the items in our line very carefully and order a greater assortment of these than you have been accustomed to do in the past. You will find that there will be a ready sale for all of them with your trade. We also wish to call your especial attention to our sets of tools, wrenches, auger bits, and wood chisels, which are put up in neat canvas rolls. We make no charge for the canvas rolls in which these sets are packed. All of these sets are very popular and dealers who have stocked them are sending us repeat orders right along. Another item which we wish to call your especial attention to is our lining up and special taper punches. If you will send us an order for an assortment of these, you will find that they will sell readily to your trade. If you have not been selling our force-feed oil can, we recommend that you read carefully our description of same and send us a trial order for one dozen. We will send you a cut open oil can free with your first order for show case and counter display, and we guarantee that if you place this cut open can in a prominent place in your store, you will very soon send us a repeat order for oil cans. Other new items that we wish to call your especial attention to, are our cleavers, butchers' steels and pocket knives.

**GUARANTEE**—Our goods are unconditionally guaranteed for all time. The following is the way we would write our guarantee:

"If, for any reason in the world, you are not fully satisfied in every way with all goods bought from us, please let us know promptly and we will make matters right with you."

If the above guarantee does not suit you, you may write your own guarantee of our goods. We will allow you to dictate all conditions of every sale to suit yourself, except the price and terms.

**PRICES**—Our prices are the same to one and all. We guarantee all our goods to be good value for the money we ask for them. All our goods are sent forward on approval. Only when you feel better about goods of our make than you would about their equivalent in cash in the bank, do we consider that we have fulfilled our part of any transaction. When you do not feel that way about our goods, we are prepared to take them back, either in whole or in part, for free exchange or cash refund, whichever you prefer, and we will pay the transportation charges both ways.

**TERMS AND DELIVERY**—Our terms are 30 days net or 2 per cent discount for cash in 10 days, to responsible parties. In order to give our customers prompt service, we ship all goods by express or parcels post, and when our invoices are settled for strictly in accordance with our terms we allow full transportation charges to destination. Our slogan to our dealers is, "Pay promptly and save the transportation charges." We aim to carry a complete stock, so that we can fill all orders complete the day they are received.

**REGARDING PLACING OF ORDERS**—We aim to have our salesmen call on you with a complete line of samples twice each year, or at least once a year. We hope you will preserve this catalogue and if you are in need of anything in our line between the calls of our salesmen, that you will send us a mail order for such items. Our salesmen will receive credit for your mail orders and the goods will be invoiced to you at exactly the same prices as if our salesmen had called on you and taken your order. If you live West of the Mississippi River, send your order to our Albert Lea, Minnesota, office, if you live East of the Mississippi River, send your orders to our Chicago, Illinois, office.

**TO PROSPECTIVE CUSTOMERS**—We bespeak of you who have not bought goods from us in the past, to give us a trial order the next time you are in need of anything in our line. If our merchandise, service and prices do not please you in every way, simply return the goods and we will give you full credit for them and pay the transportation charges both ways. Because you may happen to live in the far East, South or West, we do not want you to get the notion that we are too far distant from you to give you prompt service. We are serving many dealers in your locality, no matter where you live. We ship by express or parcels post and allow full transportation charges to destination when our invoices are settled in accordance with our terms, which are 30 days net or 2 per cent discount for cash in 10 days.

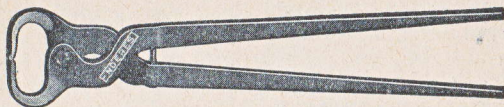

Yours for service and better made goods,

Enderes, Incorporated,

## THE ENDERES DIRECT FORCE FEED OIL CAN

(Patented)

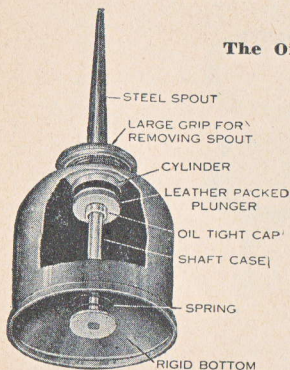

**The Oil-Right, Oil-Tight Oil Can  
That Won't Clog**

**A TWENTIETH CENTURY INVENTION  
Up-to-the-Minute and Practical**

**SEE CONSTRUCTION**—Self Contained—No Projections to Bend or Break—Natural to Operate—Perfect Control.

**SUBSTANTIAL**—Made from 24 Gauge Steel, Copperized—Will outlast ten ordinary spring bottom oil cans.

**NOT A CHEAP OILER, BUT A GOOD  
OILER, CHEAP**

Number	Description	Capacity	List Price Each
1	With 5" Steel Spout (Straight or Bent)	Full Half-Pint	\$2.00
2	With 9" Steel Spout (Bent)	Full Half-Pint	2.30

Packed One Dozen in a carton.

Oilers with 5" Spout will be shipped half with straight spout and half with bent spout. All 9" Spouts will be bent.

Fine cut-open sample for counter or show case display with each first order of one dozen Oilers or more.

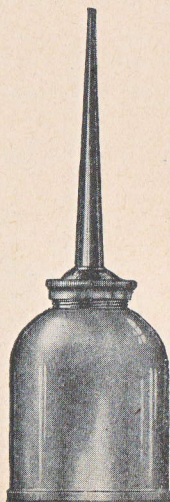

Every Oiler warranted to be perfect and satisfactory in every respect.

The timely and proper oiling of all machinery is generally in proportion to the ease with which it can be done. No machinery will give good satisfaction unless it is properly oiled. An ordinary oil can with the spout clogged often deceives the operator into thinking he is oiling when his oil can is not giving oil. When there is oil in an Enderes Oil Can, and the plunger is pushed in, there is no question about the can's giving oil.

This Oil Can is adapted for any liquid from gasoline to the heaviest kind of oil.

This Oil Can is worth its weight in gold in cold weather when thick or heavy oil is used. No heating of oil or can is necessary.

This Oil Can is an oil saver in hot weather when thin oil is used, because plunger can be closed, thereby allowing no oil to flow until desired.

Large Bit with one each No. 30 and No. 40 Cutter— $\frac{7}{8}$ " to 3".....		10.00

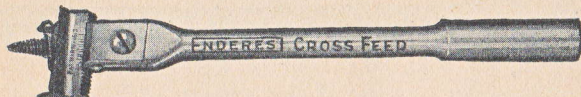

## THE MARK OF

SELECTION

**ENDERES**

PROTECTION

PRODUCTS

**ENDERES SPECIAL CROSS FEED EXPANSIVE  
MACHINE BITS**

Size	Range of Bits	List Price Each
Small Bit with one each No. 10 and No. 20 Cutter— $\frac{5}{8}$ " to $1\frac{3}{4}$ ".....		\$10.00
Large Bit with one each No. 30 and No. 40 Cutter— $\frac{7}{8}$ " to 3" .....		12.00

These Bits have turned Shank  $2\frac{1}{2}$  inches by  $\frac{1}{2}$  inch diameter and are made with Special Screw.

**EXTRA CUTTERS FOR CROSS FEED EXPANSIVE BITS**

Size	Range of Cutters	List Price Each
No. 10 Cutter for Small Bit $\frac{5}{8}$ " to $1\frac{1}{8}$ ".....		\$1.10
No. 20 Cutter for Small Bit $1\frac{1}{8}$ " to $1\frac{3}{4}$ ".....		1.40
No. 30 Cutter for Large Bit $\frac{7}{8}$ " to $1\frac{3}{4}$ ".....		1.90
No. 40 Cutter for Large Bit $1\frac{3}{4}$ " to 3" .....		2.20
No. 50 Cutter for Large Bit 3" to 4" .....		3.30
No. 60 Cutter for Large Bit 4" to 5" .....		4.40

The above cutters will fit either Hand or Machine Cross Feed Expansive Bits.

The effectiveness of a regular Expansive Bit is often lost because its cutter slips or creeps.

This fault is absolutely removed in an Enderes Cross Feed Expansive Bit because the cutter intermeshes with a cross feed screw which is firmly held in the plate or gib; this, when screwed down, can not move.

The cutter is forced into a dovetail and directly against the stem of the bit, thus giving it a wide and firm bearing.

The cutter itself is of special construction, having a uniform bevel or cutting edge its entire length.

These superior points of construction coupled with the high workmanship and high-grade material used make it the strongest and easiest boring Expansive Bit on the market.

## POCKET KNIVES

Pocket knives are given more abuse by the average users than any other tool or implement known to man. The abuses to which pocket knives are subjected are almost unlimited. Before we began making our line of household and butcher knives, there were very few satisfactory knives of that kind on the market. Our line of household and butcher knives has given such excellent satisfaction to consumers and dealers, that we have repeatedly been urged by our customers to bring out a line of pocket knives that would prove as satisfactory as our line of household and butcher knives. As a consequence, we set about to learn just what requisites the blades of a pocket knife must possess in order to give entire satisfaction. Our study of the pocket knife question brought us to the conclusion that the steel from which the blades should be made must combine hardness, toughness, flexibility, resistance to shock and abuse, and that it must be capable of being sharpened to, and hold, a keen cutting edge. Car-Van Steel (which is an abbreviation for carbon-vanadium steel), from which the blades of our knives are made, we are convinced comes nearer to the requisites above named than the blades in any other pocket knife that has as yet come to our notice. It has taken a number of years to develop Car-Van Steel. In the development of this steel, a good many theories were advanced by very prominent steel makers which did not work out in practice. Car-Van Steel is not supplied for any other purpose than the manufacture of blades for our knives. Many tests of Car-Van Steel have been made by steel experts in other lines of industry and it is their universal verdict that nothing yet developed equals Car-Van Steel for making knife blades.

We did not set out to place a cheap pocket knife on the market. There were plenty of these on the market before we entered the pocket knife field. We guarantee our pocket knives to be good value for the money we must ask for them and to give entire satisfaction, and failing to do so we are prepared to take them back either for free replacement or refund of the purchase price. We are pleased to submit them to the most critical hardware dealers and users for their verdict.

At present we are prepared to supply our Enderes pocket knives with Car-Van Steel blades, in twenty-one patterns, consisting of pen pattern knives with two and three blades, some of which have bolsters or caps on the ends and others without bolsters or caps; jack pattern knives; and combination jack and pen pattern knives. We put nothing but good, serviceable handles on our knives. The kinds of handles that we use are Pyra Stag, Bone Stag, and Pyra in Assorted Colors, as follows:

Abalone Pearl  
Black  
Green Pearl  
Silver Pearl

White Iridescent Pearl  
Golden Pearl  
White  
Cocobolo over White

All our knives are brass lined, and our bolsters or caps are made from liberty silver. The blades of our pocket knives, as is also the case with the blades of our other knife line, are not highly polished. High polish adds nothing to the actual value of the blade, while on the contrary the process of highly polishing a blade has a tendency to draw the temper in the cutting edge of the blade.

As we have been unable, so far, to get cuts with which to illustrate our pocket knives, we are going to do the best we can to give you a description of them following.

# TO DEALERS

Please note very carefully and remove from catalog.

---

The confidential discount sheet pasted in this catalog shows the discount that we recommend you to quote consumers from our list prices. We allow you 33 1-3% discount beyond our recommended discount to consumers. It is our intention to mail one of these catalogs, together with discount sheet, to every butcher shop and garage in the entire United States. As a consequence, we expect to receive a lot of mail orders from butchers and garages. These mail orders will be filled at our recommended resale prices to consumers. We are going to give our dealers credit for their profit of 33 1-3% on all retail mail orders received by us. If we get a retail mail order from your locality and you are our dealer, you will receive a credit memorandum for your profit. In cases where we receive retail mail orders from localities where we have more than one dealer, the profit on those retail mail orders will be divided among our dealers there in proportion to the amount of goods they have bought from us in the past. We have always made a practice of having our salesmen call on butchers and garages, soliciting orders at retail prices; and on all goods sold at retail in that manner, we have given our dealers credit for their profit on such orders. In some cases we have shipped the goods direct to the consumer. In other cases we have shipped the goods through our dealer. In some instances, the butchers and garage men have objected to getting their goods through the local hardware dealer because they surmised that the local hardware dealer would then make a profit on the goods. In other cases, our salesmen have taken orders from retail customers for goods to be shipped through our dealer, and the dealer has objected to having the goods come through him because the butcher or garage man did not have a satisfactory credit standing. We only aim to have our salesmen call on the trade about twice each year, and, that being the case, we deem it advisable to have our catalog in the hands of butchers and garage men, so that they can mail order for their needs in our line between the calls of our salesmen. If the butchers and garage men who send us mail orders are financially responsible, we will ship them goods on open account, subject to their approval, on our usual terms of thirty days net or two per cent discount for cash in ten days. If they are not financially responsible, we will ship them the goods C. O. D.

(over)

We have given this matter considerable thought and we believe that the above arrangement will work out to the best satisfaction of all concerned. Please understand that the only way we solicit business from consumers is at our recommended retail prices, and so long as we are going to continue to give the dealers' profit on all retail sales, to our dealers, we can see no reason why any of our dealers should object to an arrangement of this sort.

### **SPECIAL PRICES ON MEPHISTO BITS**

We have discontinued to sell Mephisto Bits for the W. A. Ives Mfg. Co. We still have a fairly good stock of Mephisto Bits on hand. If you are now selling Mephisto Bits and want more of them, we suggest that you write us for list of Mephisto Bits that we have on hand at present. We are selling our present stock of Mephisto Bits at a very special price.

Please note the very complete line of Enderes Bits that we now carry, as listed in this catalog. Our new Enderes Bits are made and finished as auger bits should be.
